Neopost USA Introduces New Line of Easy-to-Use Document Folders

PF & HF Series Designed to Reduce Costs and Enhance Productivity for All Folding Applications

MILFORD, CT, June 15, 2010 – [Neopost USA](#) has introduced its new line of easy-to-use Neopost PF and Hasler HF document folders. The series of robust desktop folders deliver outstanding performance and value-added features that make them the perfect systems for small to mid-size businesses requiring increased productivity. Print or mail shops, law firms, healthcare facilities, schools, churches and many other offices will see their mail processing greatly enhanced.

Increase business productivity with user-friendly solutions

The new document folders, the Neopost PF-60, PF-80, PF-90 and Hasler HF60, HF80, HF90, are easy to use. Simply load the documents that need to be folded, select fold type and go. This makes it ideal for multiple jobs or for use by more than one operator. They are also the perfect solution for direct marketing and administrative mailings requiring common folds such as letter, z-fold, single, gate fold, fold out and double parallel folds.

Versatile and Dependable

Fast and always dependable, the PF/HF series offers six popular folds for quick set up and operation. Easy adjustments can be made to process a variety of precision folds. The new line of folders can process a range of 15,500 to 21,500 sheets per hour and handle documents up to 12 ¼" by 18". Load up to 500 sheets in the hopper at one time without having to fan out the paper. You're guaranteed tight, crisp and professional folds with every run. The unique and highly productive telescoping outfeed stacker gives you unmatched output ability and keeps the folded documents in a neat sequential order.

- 2 -

A centrally located, user-friendly control panel makes the step-by-step user interface second to none in simplicity and convenience. The unique Daily Mail Mode feeder allows up to four stapled or unstapled sheets to be folded at one time through a dedicated feed system, with its own guides, paper sensor and independent skew adjustment system.

The folders have the ability to customize fold jobs in virtually any configuration requiring up to two folds. They also provide cross-folding (standard feature) versatility that allows additional folds in a second pass to accommodate large documents and newsletters. Conveniently, the compact size of the new PF/HF series systems allow them to easily fit on any tabletop.
